Professional Summary

Recent Computer Science graduate focused on software development, with experience building Java and Swift projects, working in team-based development environments, and using Git/GitHub for version control. Interested in software engineering roles involving backend development, cloud platforms, and web applications.

Technical Skills

Languages: Java, SQL, CSS, Swift

Tools: Git, GitHub, Microsoft Office, VS Code, Xcode

Concepts: Object-Oriented Programming, Agile Development, API Integration, CRUD Applications

Completed Projects

FitnessApp (Senior Project)

GitHub: <https://github.com/Kinglos01/FitnessApp>

- Co-developed a team-based mobile fitness application in Swift for a senior capstone project.
- Integrated workout API data to support personalized workout recommendations and exercise browsing.
- Built features for user registration, profile management, fitness assessment, and progress tracking.
- Collaborated with a 5-person team using Git/GitHub and Agile-style development practices.

Task Manager Application

GitHub: <https://github.com/sames007/TaskManagerApp>

- Developed a task management application using Java
- Implemented functionality to create, update, and delete tasks
- Designed program logic to manage user input and task organization
- Applied object-oriented programming principles to structure the application

CollaBoard

GitHub: <https://github.com/d-jason32/CollaBoard>

- Collaborated in a team to develop a project-based application
- Contributed to feature development and overall functionality
- Worked with version control (Git/GitHub) for collaboration and code management

- Assisted in designing and implementing application components

Work Experience

Retail Associate

The UPS Store, Merrick, NY | Apr 2023 – *Present*

- Processed customer shipments for UPS, including packing fragile items and verifying labels and dimensions.
- Operated print/scan equipment to complete customer print orders.
- Handled POS transactions and daily cash reconciliation; balanced till at shift end.
- Resolved tracking inquiries and provided rate/packaging recommendations to reduce customer returns.
- Maintained store inventory, restocked supplies, and supported opening/closing procedures.
- Did faxing, scanning, printing, copying, Amazon, TikTok, Temu, Happy Returns, etc., and processed them.

Retail Associate

Abercrombie & Fitch, Deer Park, NY | Apr 2022 to Jan 2023

- Performed multiple different things such as the main cashier and backup cashier.
